## DETAILED ACTION

### *Allowable Subject Matter*

1. The following is an examiner's statement of reasons for allowance:

The prior art of the record fails to teach an electronically commutated brushless motor comprising; a housing having a circumferential internal wall, and an end wall formed near a proximal end of said housing that the internal wall extends proximally past the end wall, the housing being closed at a distal end by a first end cap and closed at the proximal end second end cap, at least one position sensor for sensing a position of a rotor of said motor during operation of said motor, a bridge integrally formed with an end wall formed at the proximal end of the housing, the bridge configured to substantially enclose and precisely support said position sensor within a generally hollow interior area of said bridge adjacent an interior area of said housing a plurality of locating ribs integrally formed on said internal wall of said housing and configured to precisely situate a stator, and, wherein said locating ribs and said bridge, both being integrally formed on said housing, eliminate the possibility of misalignment of said position sensor relative to said stator during assembly of said motor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
